

Analysis of financial mechanisms in frames of GIZ project “Modernisation Partnership for Energy Efficiency in Hospitals”

Client

GIZ

Country

Ukraine

Duration

from 12.2017 to 02.2018

Services of iC

- Market analysis
- Analysis of financial mechanisms (private and public)
- Recommendations regarding attracting financing

Project objectives

The overall goal of this assignment was to equip the project and its partners with the knowledge and tools regarding the existing opportunities of financing energy efficiency measures in hospitals

Project description

GIZ project “Modernization Partnership for Energy Efficiency in Hospitals” is aimed at supporting the exploitation of energy saving potential in the public buildings sector. This goes through consulting support at the city level regarding modernization of hospitals that are some of the most energy intensive public buildings in Ukraine

Project data

The Brochure presenting various national, regional, international and private funding opportunities was prepared in frames of the assignment. The primary recipients of the information recipients were the two municipal medical institutions in partner cities Chernihiv and Sumy

Services

- Relevant data regarding financial opportunities, projects implemented, scoping and analysis
- Interviews with relevant stakeholders in governmental authorities and donor organizations
- Analysis of current financing possibilities for implementing energy efficiency in medical institutions including recommendations on qualification and participation conditions
- Identifying potential synergies of various donor and IFI programs in the field
- Reviewing most representative case studies and success stories
- Developing practical recommendations for the medical institutions for attracting financing for energy efficiency improvements
